

YOGRAJ SURESH GARAD

+91 9850550013 | yograjgarad4@gmail.com | [Linkedin](#) | [Github](#)

SUMMARY

AI and Data Science graduate equipped with strong foundational skills in Python, SQL, PyTorch, and Machine Learning. Experienced in executing deep learning methodologies, data visualization, and causal representation learning through rigorous academic research and hands-on project implementation. Passionate about translating complex data into actionable insights.

EDUCATION

Bachelor of Engineering in Artificial Intelligence & Data Science	2022-2026
Babasaheb Naik College of Engineering, Pusad -445204	CGPA: 7.44
Higher Secondary Certificate (HSC)	2020 – 2022
Shri Shivaji Junior College, Pusad-445204	Percentage: 79
Secondary School Certificate (SSC)	2019-2020
Shri Shivaji High School, Pusad-445204	Percentage:78

SKILLS

- **Programming Languages :** Python, SQL, HTML
- **Data Analysis:** Pandas, NumPy, Seaborn, Power BI, Exploratory Data Analysis (EDA), Matplotlib, Plotly
- **Databases :** MySQL , PostgreSQL
- **Other Tools & Skills :** Power BI, Excel, Jupyter Notebook, GitHub, Prompt Engineering, Data Visualization, Exploratory Data Analysis (EDA)

PROJECTS

Learning Causal Semantic Representations for Robust OOD Prediction :

- Developed a Causal Semantic Generative (CSG) Model using PyTorch to learn semantic and variation factors from image data. Improved model generalization and reduced spurious correlations.
- Implemented deep learning architectures for robust Out-of-Distribution (OOD) prediction, improving model generalization on unseen data.
- Trained and evaluated the model on the MNIST dataset using neural networks, causal representation learning, and generative modeling techniques

Amazon Sales Analysis Dashboard | Power BI, SQL :

- Developed an interactive sales analytics dashboard using Power BI.
- Analyzed YTD/QTD sales, product performance, and customer review trends.
- Created DAX measures, KPI cards, and dynamic visualizations for business insights.
- Implemented filters and drill-down reports to enhance data exploration and decision-making

Walmart Sales Analysis | Python, SQL :

- Engineered an end-to-end data pipeline utilizing Python and SQL (MySQL and PostgreSQL) to extract, cleanse, and process raw retail datasets into structured formats
- Executed complex queries to resolve specific business use cases and authored a comprehensive Jupyter Notebook to document the exploratory data analysis (EDA) workflow.
